

The logo of this website – drops of water falling into a rippling body of water – attempts to visually convey the notion of all humankind being part of a whole; particles of the universal or Single Soul (nafs-i wāḥidah); the individual components of the matrix of existence; the diverse manifestation of the one Reality: Monoreality. To understand this is the foundation stone of Spiritual Science and to experience this reality consciously is to actualise the potential of every human being – the return of the self-realised drop to its origin, the ocean!
